34.01: General Provisions

(1) Scope, Purpose and Effective Date. 114.3 CMR 34.00 governs the determination of rates of payment by all governmental units for prostheses, prosthetic devices and orthotic devices provided to publicly-aided individuals. 114.3 CMR 34.00 is effective June 1, 2002. The rates set forth in 114.3 CMR 34.00 do not apply to individuals covered by M.G.L. c. 152 (the Worker's Compensation Act). Rates for services these individuals are set forth in 114.3 CMR 40.03(2).

(2) Coverage. 114.3 CMR 34.00 and the rates of payment contained herein apply to the direct purchase and repair of prescribed custom-made prostheses and prosthetic devices manufactured and supplied by eligible providers, including the cost of customized fitting and client service. 114.3 CMR 34.00 also applies to the purchase and repair of orthotic devices. These rates are full payment for prostheses, prosthetic devices and orthotic devices provided by sale, as well as full payment for any related supervisory or administrative duties rendered in connection with the provision of prostheses, prosthetic devices and orthotic devices.

(3) Disclaimer of Authorization of Services. 114.3 CMR 34.00 is not authorization for or approval of the procedures for which rates are determined pursuant to 114.3 CMR 34.00. Governmental units that purchase care are responsible for the definition, authorization, and approval of care to publicly-aided individuals.

(4) Coding Updates and Corrections. The Division may publish procedure code updates and corrections in the form of an Informational Bulletin. The publication of such updates and corrections will list: 1) codes for which the code numbers only changed, with the corresponding crosswalk; 2) codes for which the code remains the same, but the description has changed; 3) deleted codes for which there is no crosswalk; and 4) for entirely new codes that require new pricing, the Division will list these codes and apply individual consideration in reimbursing for these new codes until appropriate rates can be determined.

5) Authority. 114.3 CMR 34.00 is adopted pursuant to M.G.L. 118G.

34.02: General Definitions

Meaning of Terms. Terms used in 114.3 CMR 34.00 have the following meanings:

ABC. American Board for Certification in Orthotics and Prosthetics .

Additions To - 114.3 CMR 34.03 contains "add-on" procedures. The "add-on" codes are added to the base procedure code if additional and more complicated services are provided. Normally the value assigned to the "add-on" codes does not represent the actual value of the component but only the difference in value between the base component found in the base procedure code and the "add-on" component being substituted.

Adjusted Acquisition Cost. The price paid to a supplier by an eligible provider for prostheses, prosthetic devices and orthotic devices after adjusting for quantity discounts and excluding all associated costs such as, but not limited to, shipping, handling and insurance costs, etc. The adjusted acquisition cost does not exceed the price to the eligible provider as listed or determined in the manufacturer's current catalogue and must be evidenced by a current invoice. Where the manufacturer is the provider, the adjusted acquisition cost can not exceed the actual cost of raw materials. Low cost items (those with adjusted acquisition cost less than \$5.00) may be grouped together and billed at \$5.00 plus the mark-up listed in 114.3 CMR 34.03(7).

Base Procedure - The basic procedure in each section that usually indicates the simplest form of service being provided.

BOC, Board for Orthotics/Prosthetic Certification

BCP, Board for Certification in Pedorthics

Custom Fabricated - The appliance was made for the patient from measurements or patterns only.

Custom Fitted - No casting or molding techniques were used to fabricate the appliance. It is normally a stock item that is fitted and adjusted to the patient.

Direct Formed - Direct molding of plastic or similar material on the involved portion of the body. This material is used in the appliance being fabricated.

Eligible Provider. An eligible prostheses provider is an ABC or BOC certified prosthetist or one who employs any ABC or BOC certified prosthetist who meets the conditions of participation adopted by the purchasing governmental unit. An eligible provider of orthotic devices is an ABC or BOC certified orthotist or one who employs any ABC or BOC certified orthotist who meets the conditions of participation adopted by the purchasing governmental unit. An eligible pedorthic provider is a BCP certified pedorthist or one who employs a BCP certified pedorthist who meets the conditions of participation adopted by the purchasing governmental unit.

Endoskeletal - In prosthetics, this term implies a modular approach. It includes all manufacturers of endoskeletal components.

Exoskeletal - In prosthetics, this term is the basic procedure that precedes each major section. It implies the traditional plastic laminated approach to finishing a prosthesis.

Fabrication and Fitting. Time spent in examining the patient; making necessary patterns and measurements; and performing fittings, including static and dynamic alignments and fitting refinements.

Flexible - Normally refers to surgical garments or corsets made from material, with reinforcing stays and paraspinal spring steels. Governmental Unit. The Commonwealth, any department, agency, board or commission of the Commonwealth and any political subdivision of the Commonwealth.

Immediate Fit - Relates to the application of a prosthesis in the operating or recovery room, and the appropriate cast changes.

Initial Prosthesis - Relates to the application of a plaster direct formed Below Knee or Above Knee prosthesis that is not an immediate fit, and is not intended for extensive use.

Interface Material - Lining material that is inserted between the body and the structural support.

Molded Socket - In orthotics, this term implies that an impression was taken, modified, and a socket of thermoplastic or other material was made over the model. In prosthetics, this term implies that a generally accepted fitting procedure, such as PTB or quadrilateral socket, was molded over a modified patient model.

Molded To Patient - Direct molding of plastic or similar material on the involved portion of the body. This material is used in the appliance being fabricated.

Molded To Patient Model - A positive mold is developed from a plaster cast of the involved portion of the body. This positive mold provides the patient model from which the appliance is fabricated.

Nonmolded - No casting or molding techniques were used to fabricate of the appliance. It can be a stock item or made from measurements or patterns only.

Orthotic Device. A mechanical device that is designed to support or correct any defect of form or function of the human body, and generally known as a "brace" or "orthosis," but not including dental braces or breast prostheses.

Premolded - No casting or molding techniques were used to fabricate the appliance. It can be a stock item or made from measurements or patterns only.

Preparatory Prosthesis - 114.3 CMR 34.03 provides patients with a device that allow for extensive gait training for lower limb amputees, and extensive functional training for upper limb amputees. It serves as the final step before the definitive application. A patient with a preparatory prosthesis need not be in the hospital, but is still undergoing changes to the amputation that preclude the fitting of the definitive prosthesis.

Prostheses. A mechanical device that either replaces all or part of an extremity, generally known as an "artificial limb."

Prosthetic Device. Any substitute or ancillary equipment or component part used in a prosthesis for replacement or modification purposes.

Publicly Aided Individual. A person for whose medical and other services a governmental unit is in whole or in part liable under a statutory program.

Thermoplastic or Equal - Implies that the device is fabricated from a thermoplastic material or a thermosetting plastic resin approach.

34.03: Rate Provisions

(1) General Rate Provisions for the Purchase of Prostheses and Prosthetic Devices. Payment to eligible provider of prostheses or prosthetic devices shall be the lower of:

- (a) the eligible provider's usual and customary charge to the general public; or
- (b) the fee set forth in 114.3 CMR 34.03(10).

(2) General Rate Provisions for the Purchase of Orthotic Devices. Payment to an eligible provider of orthotic devices is the lower of:

- (a) the eligible provider's usual and customary charge to the general public; or
- (b) the fee set forth in 114.3 CMR 34.03(9).

(3) Effect of Rates. The rates of payment contained in 114.3 CMR 34.00 are maximum allowable rates that a governmental unit or purchaser under M.G.L. c. 152 may pay for prostheses, prosthetic devices, or orthotic devices. A governmental unit may pay less than the rates established for a provider under 114.3 CMR 34.00 provided that any such discount or reduction in charge by the eligible provider is equally available to all governmental units purchasing prostheses, prosthetic devices and orthotic devices from the provider. No rate of payment under 114.3 CMR 34.00 shall exceed the provider's charge to the general public for the same or similar device.

(4) Terms and Warranties. All terms and warranties, expressed and implied, that are customarily extended by the provider or manufacturer must apply to purchases made under this regulation. A purchaser will not pay for replacement or repair of any item or service covered by such terms or warranties.

(5) Repairs. For repair services providers must maintain and submit adequate documentation on the repair performed as indicated by the purchasing governmental unit. Repair may be billed using codes for the labor component (L7520 for prosthetics or L4205 for orthotic devices) and the parts used in the repair (L7510 for prosthetics or L4210 for orthotic devices).

(6) Individual Consideration. Procedures designated I.C. are individual consideration items meaning that the charge by an eligible provider for services designated I.C. is given individual consideration. The purchasing governmental unit analyzes the eligible provider's report of services submitted before making a determination.

Providers must keep adequate records to substantiate their I.C. claims and must provide these documents including copy of current invoice to the purchasing agency upon demand. Payment to an eligible provider for individual consideration is the lowest of:

- (a) the eligible provider's usual and customary charge to the general public;
- (b) the adjusted acquisition cost to the eligible provider plus a markup not to exceed:
 - 1. 70% for any item whose adjusted acquisition cost is less than \$100; or
 - 2. 50% for any item whose adjusted acquisition cost is \$100 or greater and less than \$200; or
 - 3. 45% for any item whose adjusted acquisition cost is \$200 or greater and less than \$300; or
 - 4. 40% for any item whose adjusted acquisition cost is greater than \$300.
- (c) Such schedule of allowable fees as may be issued as an amendment or revision to 114.3 CMR 34.00.

Note: The orthotic care of scoliosis differs from other orthotic care in that the treatment is more dynamic in nature and utilizes ongoing, continual modification of the orthosis to the patient's changing condition. This coding structure uses the proper names, or eponyms, of the procedures because they have historic and universal acceptance in the profession. It should be recognized that variations to the basic procedures described by the developers are accepted in various medical and orthotic practices throughout the country. All procedures include model of patient when indicated.
